CORPORATE SOCIAL RESPONSIBILITY  
AND SUSTAINABLE DEVELOPMENT

In 2010 the Group continued and further strengthened its efforts for self improvement in all areas of Corporate Social Responsibility and Sustainable Development.

In respect to the top priority, safety at work, the Group focused on the implementation of the entire range of programs that were designed and adopted to support the achievement of its goals and particularly to develop and maintain a culture of accident prevention, taking stock from the know-how and the experience developing in all TITAN operations and through the participation in the Cement Sustainability Initiative, for the on-going and systematic training of both direct and contractors' personnel.

The introduction of new and more stringent goals for reducing the environmental footprint of the Group in 2009, a year earlier ahead of the original commitment as formulated in 2006, has intensified the effort in all production units for further optimization of the energy efficiency, the minimization of their dependence on conventional fuels, the improvement of the tools for management and measurement of the results, the better understanding and measurement of the product life cycle and social contribution.

Acknowledging stakeholders' need for communication, the Group also continued the implementation of stakeholder engagement programs with employees, local communities, local authorities and other key stakeholders, while we proceeded with the issue of our 1st Corporate Social Responsibility Report in FYRoM.

As a member of the World Business Council for Sustainable Development Cement Sustainability Initiative, TITAN participated in the process and the consultations for the development of the new 5year targets toward 2015.

The TITAN Group has improved its position in the list of the 1000 global leaders in sustainability performance, according to the Global 1000 Sustainable Performance Leader Ranking issued by Justmeans in 2010. TITAN gained 170 points and is included among the 300 best companies in sustainability performance worldwide. Recognition of TITAN efforts in corporate social responsibility encourages self-commitment and further self improvement in the future.
